- **Frameworks**: React, Node.js, Flask, JUnit, Angular, Entity Framework Core 6, Spring Boot, NgRx, Jest, Vitest, Vue
- **Developer Tools**: Git, Docker, Figma, Adobe XD, VS Code, Visual Studio, XCode, Amazon Web Services, Cypress.io
- **Frontend Practices**: Frontend Performance Optimization, Accessibility, Cross-Browser Compatibility
- **Application Development**: API Development, Web Application Development, Mobile Application Development

CERTIFICATIONS

- AWS Cloud Developer - Associate

EXPERIENCE

Louisiana Office of Technology and Services (OTS) **Feb 2026 - Present**
UI/UX Designer and Engineer *Baton Rouge, LA*
- Design and create user-centered mockups and visual concepts for websites across multiple Louisiana state departments
- Translate approved designs into accessible, responsive web applications using Eleventy (11ty), HTML, CSS, and templating languages (Liquid/Nunjucks)
- Build and maintain reusable design system components to promote consistent user experiences across state agency websites
- Collaborate with stakeholders and cross-functional teams to align web application design with usability, branding, and accessibility standards (WCAG compliance)

Applied Research Associates (ARA) **Jun 2022 - Feb 2026**
Software Engineer *Baton Rouge, LA*
- Collaboratively contributed to the development and delivery of .NET/React web applications supporting critical federal contracts
- Utilized Entity Framework Core 6 to map data to and from databases and support reliable application functionality
- Applied React.js and Redux to build intuitive front-end interfaces for web applications
- Conducted quality assurance for multiple applications through manual testing and automated testing scripts, identifying issues before delivery
- Created mock-ups for various projects and workflows for client review and implementation

IBM **Jun 2021 - Jun 2022**
Application Developer - Java Web Applications and Technologies *Baton Rouge, LA*
- Collaborated on diverse client projects for IBM, contributing to the delivery of full-stack Java and iOS applications
- Developed full-stack Java applications and iOS applications while troubleshooting issues across application components
- Embraced Agile methodology and facilitated weekly SCRUM meetings to discuss project progress and coordinate team work
- Proactively pursued opportunities to broaden my skill set and knowledge, leveraging IBM's robust toolset to master new languages and technologies

TWG Company **May 2020 - Sep 2020**
iOS and Java Application Development Intern *Remote*
- Developed a social media application for mobile and web-based devices with features similar to TikTok and Instagram
- Communicated daily with my team and organized SCRUM meetings
- Assessed and troubleshot application issues and bugs to support smooth functionality
- Deployed a beta application to a test group in New Jersey to evaluate application readiness and potential popularity
